Heavy Duty Rock Reamers

SlimDril can offer the Drilling Contractor a large range of Heavy Duty Rock Reamers manufactured from the highest quality materials and inspected independently to API Specifications.

SlimDril’s proven technology means they can supply rock tooling for the most challenging rock projects all over the world, using either replaceable cutter type or ULTRA PREMIUM “ROCKTECH” range split bit type Reamers, to suit all drilling contractors needs and budgets.

When only the best will do you need SlimDril’s most efficient and cost effective rock tooling where price per meter is critical.
